

Starchild

When billionaire financier Harrison Fairfax boards the EarthFed starship Starchild, Captain Trieka Cavendish knows hell bring trouble. Earthlubbers always do. But she has no idea trouble will come in the form of a vast government conspiracy that will turn her whole world upside down. Harrison Fairfax has spent the past seven years trying to find out what happened to his wife, an investigative journalist. But his wifes disappearance is only the beginning - and the rest is much, much worse - as he discovers a conspiracy reaching to the highest echelons of EarthFed. On to his meddling, government strongmen drive Fairfax and Cavendish into the wilds of the colony planet Denahault, where they discover even more secrets - and a passion for each other that may be the only thing that can save them.
