

Tom Swift and the Electronic Hydrolung

The Stratemeyer syndicate used the pseudonym Victor Appleton when writing several series for boys including Tom Swift. Edward Stratemeyer did the original outlines for the series, which was published between 1910 and 1941. Tom Swift was a genius inventor. He specialized in technology especially related to transportation. Later the series was followed by the Tom Swift Jr. series. Tom Swift and the Electronic Hydrolung was the 18th book in this series. This book introduces the Repelatron Ray. This invention is crucial to many of Toms future inventions including his spaceship. In Tom Swift and the Electronic Hydrolung the repelatron is used to hold back water creating a huge bubble. Tom finds a large ancient city under the water.
